Devin Clarke

SKILLS

TypeScript, JavaScript, JSX, CI/CD, Monorepo, Docker, Node, NestJS, Express, SQL, Postgres, MongoDB, React, NextJS, SolidJS, AWS, DBT, Salesforce, Apex, SOQL, ANT Migration Tool, Lightning Web Components, Go, Kafka, GraphQL, REST, Web3, Unit Testing, Quality Assurance, Front end, Back end, Fullstack, Linux, Bash, Lua, Vim, Vim Motions, tmux, Excellent written and verbal communication, Eager problem solver

EXPERIENCE

Drive Social Media, St. Louis, MO (Hybrid) — *Software Engineer*

March 2023 – PRESENT

- Co-led the project, and mentored junior developers, as we redesigned and rebuilt our entire dashboard application from scratch. Establishing and standing up the tech stack, establishing code conventions, and establishing the CI/CD pipeline on an NPM workspace monorepo with a shared interface library, greatly reducing the overall size of the code base while increasing functionality for our users
- Led and developed the initiative to automate client invoicing across the entire company, utilizing Salesforce Apex and Quickbooks, saving the finance department countless hours every week
- Was at the helm of automating client contracts creation and addendums utilizing Salesforce Apex and PandaDocs, speeding up the operations team workflow dramatically by reducing the need for manual document drafting
- Led the project to utilize DBT to create revenue and client retention data models with data from Salesforce and visualize it with GoodData, helping upper management track retention efforts
- Created a recruitment dashboard with data from Greenhouse for HR to visualize their recruitment efforts

Gungnir AG, Switzerland (Remote) — *Frontend Developer*

October 2021 – January 2023

- Developed reusable functional components with React and built pages to mock up specifications
- Developed and refactored backend resolvers with a Node.js/Express/MongoDB/GraphQL stack
- Created admin control panel for viewing of vital information and user management
- Integrated MetaMask and WalletConnect with our dApp to interact with the blockchain
- Responsible for creating multiple marketing sites to mock up specifications

The Happy Crowd, Cheney, WA — *Farmhand*

October 2019 – July 2021

- Planted crops and tended to them through summer, then harvested, and processed them, while working with a team to ensure correct cataloging and tracking of the crops
- Completed various carpentry and irrigation projects to improve safety and farm workflow

EDUCATION

St. Louis Community College, St. Louis, MO — *Computer Science*

August 2015 – May 2017
